

August 8, 2018

Dear Valued Y Member:

This notice is regarding the SLO facility remodel and important operational impacts. This information will also be on our website at [sloymca.org](http://sloymca.org) and posted in the facility.

The following information is to the best of our knowledge and is subject to change:

- On Thursday and Friday, **August 16th and 17th**, our cardio and strength equipment will be moved and assembled into our remodeled large fitness room. This includes equipment within the building and in storage.
- On these two days, August 16th and 17th,
  - **Members will not have access to the cardio or strength equipment.**
  - **MX4 will be cancelled.**
  - **There will be periods of loud noise while holes are drilled in the concrete walls.**
- Should the project go faster than anticipated, or it is determined that we can provide members with safe access to the equipment, we will notify you.
- The other classes that have been relocated or cancelled during the remodel will remain as such until the equipment is moved, assembled and the new fitness room operational. Please stay tuned for more information.
- Members will continue to enter the building from the back entrance during this next phase. (The equipment will be coming in the front entrance.)
- Parking will be further impacted during these two days, as the truck delivering equipment will be parked during the day in our lot.
- Use of the new fitness room may begin as early as Saturday, August 18th, contingent on completion of the move.

Our remodel is moving along on track and is scheduled for completion this fall. I appreciate all the patience and flexibility that our members and staff has demonstrated during the construction.

If you have not yet taken up our offer for a **complimentary personal training session**, you can schedule this at the member service desk the next time you are at the Y. Thank you for your Y membership!

Sincerely,

A handwritten signature in cursive script that reads 'Monica'.

Monica Grant, CEO
